Summary

Computer Science undergraduate specializing in Machine Learning, Deep Learning, and Computer Vision, with hands-on experience from two data science internships and award-winning project work (Best 3rd Year Project). Skilled in building end-to-end AI solutions in Python, TensorFlow, and LangChain, from face recognition and LLM-powered assistants to multi-agent research systems. Seeking an AI/ML or Data Science role.

Education

- **B.Tech in Computer Science and Engineering** *2023 – 2027*
  Centurion University of Technology and Management CGPA: 8.6/10
- **Higher Secondary Education, Class XII** *2021 – 2022*
  Oneness International School

Internship

- **Data Scientist Intern** *May 2026 – Jul 2026*
  YHills Edutech Private Limited 3 Months
- **Data Science Intern** *Nov 2025 – Jan 2026*
  Simplilearn – SkillUp 3 Months

Personal Projects

- **Multi-Agent AI Research System** *2026*
  Python, LangChain, LLMs, Multi-Agent Systems
  - Built a multi-agent research system with LangChain where specialized agents search, analyze, and summarize information for a given topic.
  - Orchestrated agent collaboration and tool usage to generate structured, well-organized research reports.
- **AI Mock Interview Coach** *2026*
  Python, NLP, LLMs, Streamlit
  - Developed an AI-powered interview coach that generates role-specific questions and evaluates candidate answers.
  - Delivered instant feedback on answer quality and areas of improvement through an interactive interface.
- **AI Video Assistant** *2026*
  Python, NLP, LLMs, Speech Processing
  - Built an AI assistant that processes video content to generate transcripts, summaries, and key insights.
  - Enabled question answering over video content for faster understanding and information retrieval.
- **Finding Missing People Detection System** *Dec 2025 – Apr 2026*
  Deep Learning, Computer Vision, TensorFlow Best 3rd Year Project
  - Designed and developed a face recognition system using deep learning-based feature embeddings and similarity matching.
  - Built optimized face detection and preprocessing pipelines, achieving 95% identification accuracy on benchmark test datasets.
  - Applied the system to support public safety and missing person identification use cases.

Technical Skills and Interests

Languages: Python, SQL, Java, C, HTML, CSS, JavaScript
Machine Learning: Regression, Classification, Model Evaluation, Feature Engineering, Scikit-learn
Deep Learning: CNNs, Transfer Learning, TensorFlow, Keras, Computer Vision
Generative AI: LLMs, LangChain, Multi-Agent Systems, Prompt Engineering
Data Analysis & Tools: Pandas, NumPy, Matplotlib, Seaborn, EDA, Git, GitHub, Jupyter Notebook

Achievements & Certifications

- **Best 3rd Year Project (2025):** Finding Missing People Detection System. *2025*
- **YHills Edutech Data Science Certificate:** Data analysis, visualization, and ML workflows. *2026*
- **Google Prompting Essentials:** Google. *Jul 2026*
- **Introduction to Generative AI Studio:** Google Cloud & Simplilearn. *Jan 2026*

Positions of Responsibility

- **AI/ML Workshop Coordinator** – Technical Fest, Centurion University *2024 – 2025*
  - Organized a hands-on Machine Learning and Deep Learning workshop for 150+ students, demonstrating CNN-based image classification using Python.
- **Data Science Club Lead** – Department of CSE, Centurion University *2024 – 2025*
  - Led 20+ members in weekly sessions on Python, EDA, and ML model building; mentored 10+ teams in Kaggle competitions and project development.
